

Large Vessel Vasculitis (LVV) is a family of autoimmune diseases characterized by

McGowan J, Chattopadhyay S and Chakravarti R (2019) 14-3-3 -A Novel Immunogen Promotes Inflammatory Cytokine Production. *Front. Immunol.* 10:1553 [Accepted]

Subramanian, G., Kuzmanovic, T., Zhang, Y., Veleeparambil, M., Chakravarti, R., ... Chattopadhyay, S. (2018). A new mechanism of interferon's antiviral action: Induction of autophagy, essential for paramyxovirus replication, is inhibited by the interferon stimulated gene, TDRD7. *PLoS pathogens*, 14(1), e1006877.

Coakley, C., Fabry, S. and Chattopadhyay, S. (2017). Establishment of a Human Cell Line Persistently Infected with Sendai Virus. *Bio-protocol* 7(16): e2512.

I would like to thank my advisor Dr. Ritu Chakravarti for training me in the many skills required for becoming a scientist, including technical skills, experimental design, critical thinking, and troubleshooting. I would like to thank other past and present members of the Chakravarti lab as well, in particular Jenna McGowan and Brent Veerman. Many thanks to Dr. Saurabh Chattopadhyay for his advice on the project and for sharing equipment and resources. I would also like to thank the members of his lab for their help, and especially Gayatri Subramanian. I would like to thank my committee members, which includes Dr. Viviana Ferreira, Dr. Heather Conti, and Dr. Kevin Pan for their support and guidance. Finally, I would like to thank my dear friends and family for their continued presence and support to
